

Why you should attend Genetec's training

Genetec products are known in the physical security industry as being among the most advanced IP security solutions. Whether you are interested in acquiring more in-depth knowledge about our products or seeking to understand basic functionalities, our experienced and friendly training team will empower you with precise tools that you will use in everyday applications.

Testimonials

"Even having field experience with the various Genetec software packages beforehand, I found the certification training to be quite informative."

George Tomlinson, President, Protocol Computer Solutions Inc.

"The overall experience has significantly improved my understanding of the Omnicast and Synergis product lines as well as IP-based security in general."

Kevin Parisien, System designer, MMM Group

"The classes that I have taken with Genetec have been very informative. I would recommend Genetec training to all security/CCTV integrators."

Sean Prendergast, Superintendent, 4th Utility

About Genetec

Genetec, incorporated in 1997, is recognized as a pioneer in IP security solutions and a technology leader within the physical security industry. With headquarters in Montreal and offices in Europe, the Middle East, Japan, Southeast Asia, and the United States, Genetec provides a complete line of innovative IP security products.

Our primary focus is the development of software solutions to address three main security application areas: IP access control, IP video surveillance, and license plate recognition. Our success is built on our team of highly skilled individuals dedicated to the development of tomorrow's cutting edge security technologies and our commitment to customer care. Empower your team Develop superior skills

LEVERAGE GENETEC'S ADVANCED
TECHNOLOGY THROUGH OUR
SOLUTIONS TRAINING

Learn how to profit from Genetec's innovation

In a professional classroom environment or from the comfort of your own office, you will learn the ins and outs of our advanced solutions. With hands-on exercises and provided materials, our qualified trainers will guide you through system components and capabilities which will offer you tremendous advantages when working on real-life security applications.

Course Types

Public training courses are scheduled 6 months in advance and schedules are published on our website. Public courses are held monthly at our Genetec training facilities in Montreal, and frequently at our Paris and Dubai offices. Public courses are also held regularly in many other major North American cities.

Custom training is offered at Genetec offices or our trainers can travel to your own office. Custom trainings can be based on any one of the public courses, or can be specifically tailored to your organization's needs. If you do not have a training facility, a custom session in Genetec's dedicated training room may be the best option.

Languages

Courses are available in either French or English, as per the schedule or upon your request.
