Genetec at IFSEC 2014—Showcasing Unified Open-Platform IP Security, Access Control and Network Appliance Innovation

Genetec Announces New Version of Synergis Master Controller and General Availability of its New SV-32 Network Security Appliance for Retail and Banking Customers

LONDON—June 4th 2014—At the annual IFSEC tradeshow (Stand #F1210), [Genetec™](#), a leading provider of unified IP security solutions, will demonstrate the latest enhancements in [Security Center](#), its unified security platform that blends video surveillance ([Omnicast](#)), access control ([Synergis](#)) and [AutoVu](#) its automated number plate recognition (ANPR). With an ongoing commitment to delivering open systems for its customers, Genetec will demonstrate how Security Center integrates an ever-growing ecosystem of third-party technology partners for access control hardware (ASSA ABLOY, HID Global, Salto) video cameras (Axis Communications, Panasonic, BOSCH-4K ultra HD IP camera, Samsung, Vivotek, SONY, Vidcie-wearable cameras) and third-party software plug-ins.

Access Control: Genetec Releases New Version of Synergis Master Controller

The [Synergis Master Controller](#) (SMC) is an intelligent IP controller engineered to address long standing customer demand for non-proprietary access control solutions. The latest version of SMC (v2.2) adds new features and support for an increasing list of popular security modules and wireless locks from HID Global, Salto, ASSA ABLOY, Axis Communications and DDS.

SV-32 Network Security Appliance

Now available for Genetec Channel Partners in the Americas, Asia, Europe and Oceania, the [SV-32](#) is the most recent addition to the Genetec network security appliance product line. Designed for customers that require a small size Network Video Recorder (NVR)—retail and banking organizations, for example—the SV-32 supports up to 32 IP cameras and offers local viewing and recording capabilities. Powered by Genetec Security Center, the SV-32 ships with pre-installed software, verified hardware configurations and

a new intuitive Installer Assistant tool, which is included with the entire line of SV network security appliances to further facilitate and accelerate the configuration and commissioning of customers' surveillance systems.

AutoVu Plate Reader Module

Genetec will demonstrate its new AutoVu Plate Reader Module, which allows end users to enhance off-the-shelf video surveillance cameras to function as automated number plate recognition (ANPR) devices to accurately detect and identify vehicles moving at lower speeds of up to 15 MPH (20km/h). The AutoVu Plate Reader Module will offer all the features of the Genetec [AutoVu](#) platform.

Genetec and Schiphol Airport Host Seminar

On Tuesday June 17, at 4:00pm in the Convergent Solutions Theatre, Genetec will welcome executives from Amsterdam's Schiphol Airport to a jointly hosted seminar titled [Crucial Aspects of Airport Security Video Surveillance](#). Mr. Bjorn O. Gunderson and Charles M. Hendriks from Schiphol will share insights on the largest camera system in the Netherlands, delivering insight on how this international airport was able to heighten efficiency, reduce costs and enact a plan for system growth.

About Genetec

Genetec develops open-platform software, hardware and cloud-based services for the physical security and public safety industry. Its flagship product, Security Center, unifies IP-based video surveillance, access control and license plate recognition (LPR) into one platform. A global innovator since 1997, Genetec is headquartered in Montreal, Canada, and serves enterprise and government organizations via an integrated network of resellers, integrators and consultants in over 80 countries. Genetec was founded on the principle of innovation and remains at the forefront of emerging technologies that unify physical security systems.
