

BCDVideo Client Workstations

Enhancing the Operator's Experience

Optimize your surveillance system's performance and deploy your system in less time with turnkey BCDVideo client workstations that come pre-installed with the Security Center unified operator application. Designed to increase viewing performance, these workstations are built to ensure a responsive experience and allow operators to get the most out of their Security Center system. Based on HP platforms, BCDVideo workstations provide top-of-the-line hardware solutions that are backed by a standard 3-year on-site warranty.

Benefits

Optimized HD Viewing Performance – Through GPU-accelerated video decoding, Security Center leverages the power of NVIDIA graphics cards onboard BCDVideo workstations to free up CPU resources and enhance viewing performance. This capability enables operators to display more high-resolution video streams from a single workstation, enhance video playback and run more simultaneous applications.

Seamless System Deployment – The BCDVideo workstations are designed for Genetec solutions and ship pre-loaded with Security Center, simplifying system specification and implementation. With in-house tested configurations and a three-year on-site hardware warranty included, these workstations provide organizations with a powerful and reliable solution.

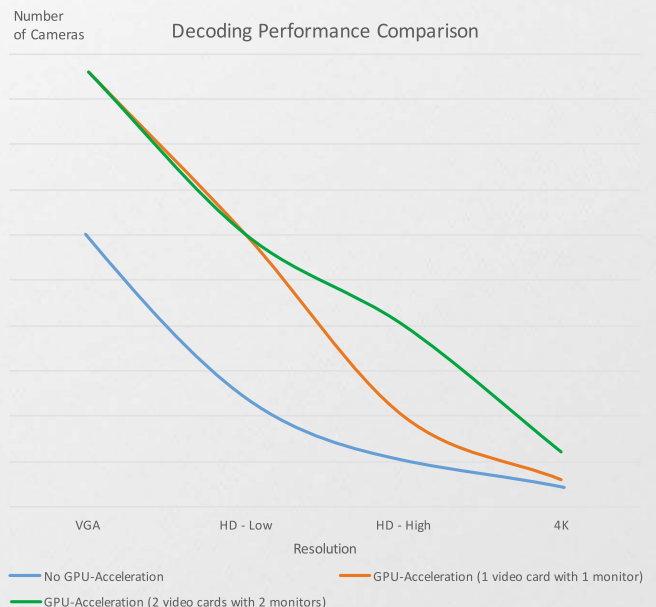

Streamlined Operator Experience – With an Intel Core i7 processor and up to 16 GB of memory, BCDVideo client workstations ensure a high-performance solution for your video surveillance application. Security Center is installed on a separate Solid State Drive (SSD), providing rapid boot time and low latency within client applications, translating into a smoother viewing and faster response times.

Key Features

Turnkey workstations with the latest Security Center software pre-installed

Equipped with Intel Core i7 processors and powerful NVIDIA GTX Graphics Cards

3-year on-site warranty

Users benefit from GPU-accelerated decoding when using high-resolution cameras

BCDVideo Client Workstations

Network Security Appliance

BCDVideo Client Workstations provide access to certified solutions with Security Center pre-installed, allowing rapid deployment of your next video surveillance project. With four configurations in different form factors available, BCDVideo workstations can help meet the needs of any security system installation. All pre-packaged options are designed to meet and exceed Security Center specifications in order to provide a simple, turnkey solution that will take full advantage of system capabilities and optimize the experience of security operators. Each workstation ships with a USB mouse and USB keyboard included.

Platform	Genetec Recommended	
Part Number	BCD-GR-QS17-SFF	BCD-GR-QS17-MT
Form Factor	Small Form Factor	Mini-Tower
Operating System	Windows 7 Professional	Windows 7 Professional
CPU	Intel Core i7 4970	Intel Core i7 4970
GPU	1 x NVIDIA GTX 750ti 2 GB	1 x NVIDIA GTX 750ti 2 GB
RAM	8 GB	8 GB
Ethernet	1 x GbE NIC	1 x GbE NIC
Hard Disk Drive	1 TB	1 TB
