## Passport 1000 P2 WiFi Campus Access Control Solution

## Campus Solutions, WiFi Technology.

Easy on the eyes and easy on the budget. ANSI/BHMA Grade 1 hardware installs easily with no wires to run to the door. Communications over an existing IEEE 802.11 b/g/n WiFi network using open standard equipment makes integration into your access control system easy. The Passport P2 provides the ultimate in flexible security with a choice of magstripe and/or HID® 125 kHz prox or 13.56 MHz iCLASS® credentials and an optional keypad. Flexible, fast and secure with the lowest cost to install? Sounds like the other guys need to go back to school.

### Features

- Intelligent, integrated ANSI/BHMA Grade 1 hardware, available in:
  - 10 Line Bored Lock
  - 8200 Series Mortise Lock
  - 80 Series Exit Device
- Supports high coercivity magstripe and HID 125 kHz prox or 13.56 MHz iCLASS contactless credentials (full authentication, all formats); supports CSN reads for other common 13.56 MHz cards, including MiFare, DesFire, and Felica
- Available with keypad
- Consolidates all components into the lock
  - Card reader, door position switch and request to exit monitoring sensors
  - Eliminates reader interface modules
- Supports 2,400 users and 10,000 events locally
- For use on exterior doors: weatherseal gasket standard; shroud available
- Battery operated: 6 AA alkaline batteries required
- Available with MicroShield® antimicrobial finish

### Available with SARGENT Designer Levers

- Studio Collection
- Coastal Series

#### MicroShield®

As part of their promise to provide innovative solutions to their customers, certain ASSA ABLOY Group brands offer the MicroShield® technology, a silver-based antimicrobial coating designed to inhibit the growth of bacteria.

MicroShield® is a registered trademark of Yale Security Inc., an ASSA ABLOY Group company.

HID and iCLASS are registered trademarks of HID Global Corporation.

ASSA ABLOY is the global leader in door opening solutions, dedicated to satisfying end-user needs for security, safety and convenience.

### Benefits

- Open architecture platform compatible with most access control systems
- Significantly reduces installation time
  - No wires needed
  - Maintains architectural integrity around the door
  - Fewer discrete components to install than traditional access control
- Uses standard IEEE 802.11 b/g/n WiFi technology; no proprietary equipment required
- No special credentials needed; works with your campus' magstripe and 125 kHz prox or 13.56 MHz iCLASS cards

### Software

Compatible with approved third party access control software
