

Corporate fact sheet

About Genetec

Genetec Inc. is a global technology company that has been transforming the physical security industry for over 25 years. The company's portfolio of solutions enables enterprises, governments, and communities around the world to secure people and assets while improving operational efficiency and respecting individual privacy.

Genetec delivers the world's leading products for video management, access control, and automatic license plate recognition, all built on an open architecture and designed with cybersecurity at their core. The company's portfolio also includes intrusion detection, intercom, and digital evidence management solutions.

Headquartered in Montreal, Canada, Genetec serves its 42,500+ customers via an extensive network of accredited channel partners and consultants in over 159 countries.

Solutions

The broad portfolio of Genetec solutions encompasses security, operations, and collaboration tools to protect and manage people, assets, and facilities.

Services, support and community

Genetec Professional Services

Our team of professionals offers remote and on-site services tailored to all types of projects, from the straightforward to the highly complex.

We work with our accredited channel partners to optimize system performance, mitigate project risks, and ensure the successful delivery of any project. Whether you're handling a security upgrade or need guidance on cybersecurity best practices, we're here to help. We work with your team to build and maintain a security system that you can rely on for years to come.

Genetec SDK and DAP

Genetec Security Center lets you expand your security platform by integrating additional systems and adding custom functionalities. Our development tools provide varying levels of access to core technologies within Security Center.

You can opt for complete video surveillance, access control, intrusion detection, analytics, and ALPR functionality through a single Software Development Kit (SDK) or select a smaller package that better suits your needs. The Development Acceleration Program (DAP) is there to help you design and deploy custom applications using our APIs and SDKs.

Genetec Consultant, Designer, and Engineer Program

We created the Genetec Consultant, Designer, and Engineer Program to support architects, engineers, and security consultants. Our dedicated team understands the complexity of your projects and provides tailored training, in-depth industry knowledge, and on-demand access to design tools.

Genetec Advantage

Genetec Advantage is a comprehensive software maintenance package that progressively grows the value of your security system and allows you to focus on your operations.

Channel Partner Program

Our Channel Partner Program is designed to support and reward highly skilled and accredited security service providers who design and deliver projects using Genetec products.

Technology Partner Program

Our Technology Partner Program is the pathway to building secure and reliable integrations with Genetec solutions.

As a technology partner, you gain access to all the latest tools and support needed to easily integrate your security systems and devices with Security Center. You'll also be able to create and strengthen partnerships with other leading technology providers and maximize co-marketing opportunities.

Grants Support Team (US only)

The Genetec Grants Support Team (GGST) offers complimentary services to help agencies in the US navigate grant funding processes. Organizations served include public sector agencies, educational institutions, public utilities, transit agencies, and healthcare organizations.
