Course Outline

Security Center AutoVu Mobile Operator Training	
Code	AU-AMO-001
Duration	~3 hours, self-paced
Target audience	This course is for enforcement officers, end users or operators looking to learn basic use and management of Genetec's AutoVu Mobile systems. This course is self-paced, and uses a combination of videos and text to cover a variety of basic functionalies for Patroller and Security Desk operation, specifically for AutoVu. Note this course ***does not teach*** most administrative configurations. It will cover some list management and creation, which requires Config Tool. There are no virtual machines provided and no certification or test for this course.
Prerequisites	Basic understanding of how to use a computer, basic understanding of computer networks, basic security principles.
Objectives	Upon completion of this course the participant will be able to: - How to use Patroller and its different installation types. - Enforcing hits in Patroller. - Hotlist, permit, permit restriction and overtime creation and maintenance. - Use and generate different reports for AutoVu mobile (reads, hits, Patroller tracking, etc.). - Monitoring AutoVu mobile events in Security Desk Monitoring.
Certification	No certification is offered for this self-paced course.
